# HLT 1 - Física Básica

①  $v = \sqrt{\frac{(\gamma \cdot KT)}{m}} \rightarrow \frac{m}{s} = \sqrt{\frac{KK}{Kg}} \rightarrow \frac{m^2}{s^2} = \frac{KK}{Kg} \rightarrow \frac{Kg m^2}{s^2} = KK$   
 $= K = \frac{Kg m^2}{s K}$

e)  $\vec{R} = \vec{A} + \vec{D}$

f)  $\vec{R} = \vec{A} + \vec{C} + \vec{D} + \vec{B}$
